Hello, I am a recent Masters graduate from ISD Rubika, France. In the last 5 years I have had experiences in multiple countries rich with different cultures & environments that constantly made me adapt to change and which is why I truly believe in the saying; Change is the only constant. This has also given me a cultural mix that has given me a fresh added perspective to my design thinking. I love linking the physical to the digital which makes think of Industrial design with a tint of tech and meaningful user experiences.

EDUCATION

ISD Rubika | Valenciennes, France

2020 - 2022

Honors obtained in Masters study in March '22 | Industrial Design Management

Shifting to an advanced level of education where I had a few professional experiences to hail from. This is where I could experiment my skills, processes and design understanding to it's max potential before I get into the professional world.

ISD Rubika | Valenciennes, France

2018-2019

Bachelors | Industrial Design

Transition to yet another city and country where I could start expressing my skills as a designer making use of the base I had built in the foundation years back in India. This is where I was exposed to design in a global perspective that had a huge spectrum.

DSK ISD | Pune, India

2016-2018

Bachelors foundation | Industrial Design

A new city in India and beginning of my design journey, creating a strong base by learning the basics of design and exploring softwares that would become my foundation to the design processes.

PROFESSIONAL EXPERIENCE

[check out some of the work I've done >>>](#)
